Age: 21
FAMILY: Single
LOCATION: Chennai
EDUCATION: MSC Computer sci
OCCUPATION: College student

Goal

- Find books
- Enjoy reading with ease
- Save time when searching
- Keep track of what I've read
- Get a clean, distraction-free interface
- Stay updated on new releases
- Have a safe and fast sign in process
- Save money and secure payment options

Frustrations

- Difficulty in finding books
- Too many steps to place an order

Pain Points

1.Difficult to discovering a good books	Users don't know what to read next too many options, and no personalized recommendations.
2. Lack of professional and expertise	In this same recommendation are shown to everyone not based on user preference.
3.Limited time to read	Users struggle to maintain reading habits,and no reminds or progress motivation.
4.Poor reading tracking system	No clear progress tracking (pages, time, goals) No reading stats or achievements.
5.Complicated navigation	Hard to find categories, saved books, or wishlist cluttered UI or existing apps
